## TEACHING EXPERIENCE

Weatherford College, Weatherford, TX (1 year)

2024 - Present

### **Adjunct Professor of Biology 2024-Present**

As an adjunct instructor in biological and environmental sciences, my aim and focuses are to ensure high quality post-secondary education to a wide range and diverse population of students from first generation college students, returning students and non-traditional students who are primarily aiming for admission into the allied health science professional programs offered at Weatherford College and neighboring colleges and universities. Most courses are taught online using the college's learning management system (LSM). Office hours and additional supplemental instruction are provided through Zoom and other real-time streaming platforms.

East Texas A&M University, Commerce, TX (2 years)

2023 - Present

### **Adjunct Professor of Psychology**

As adjunct instructor in psychology at currently ranked 58th highest universities in social mobility in student access and affordability for disadvantaged postsecondary students in the United States according to US News & World Reports, my aim and focus is to ensure high quality post-secondary education to a wide student population. The student population includes both traditional and non-traditional students as well as first generation college students. Many students within the department of psychology and special education that I instruct aspire to apply to both master and doctoral programs upon degree competition.

Dallas College, Dallas, TX (3 years)

2017 – 2020

### **Adjunct Professor in Occupational Therapy Assistant Program**

Assisted in the facilitation of the learning process of psychology through the implementation, development, and creation of a supplemental learning plan to meet the needs of college freshmen enrolled in a general psychology course. Met with students both one on one and through group sessions to review content covered in course lectures, help students organize/develop note taking skills, improve test taking skills and improve reading comprehension skills. Additional responsibilities included developing supplemental study materials for students and providing additional handouts to assist with general college study skills/preparation as needed by students or assigned by instructor of assigned course.

- OTHA 2305 – Therapeutic Interventions II
- OTHA 2331 – Physical Function in Occupational Therapy

<b>Clinical Work Experience</b>
---------------------------------

Pure Health, Dallas TX (4 years, 5 months)

2021 – Present

**Certified Occupational Therapy Assistant**

As an occupational therapy assistant on a transitional care unit with an average length of stay of two to four weeks, my duties include, but are not limited to: data collection, treatment intervention planning and execution, participation in patient/family care conferences and implementation of patient/family education. Data collection responsibilities consist of collecting data from the client's previous hospital records, occupational profile, and physician orders. Intervention planning and execution includes the use of therapeutic exercise, activities of daily living and therapeutic activities incorporating instrumental activities of daily living/community integration. For patient/family care conferences, responsibilities include collaborating with the interdisciplinary team about the patient's progress, therapy goals, anticipated discharge needs including adaptive equipment, and conveying pertinent information to the patient as well as their family members. Finally, prior to discharge, responsibilities include establishing a home exercise program, establishing time for patient/family training session and carrying out effective training sessions.

Post-Acute Medical, Richardson, TX (5 years)

2020 – Present

**Certified Occupational Therapy Assistant**

Acute rehab setting for patients with a wide range of medical conditions including stroke, brain injury, total joint replacements, and other long-term medical conditions. Mostly covering weekend and holiday shifts, my personal aim is to provide continuity of care to further progress patients towards their goal of reaching modified independence with all ADLs and IADLs. The average length of stay ranged between two to three weeks, with patients receiving three hours of therapy services per day, six days a week.

Vibra Hospital of Richardson, Richardson, TX (10 years)

2015 - 2025

**Certified Occupational Therapy Assistant**

The focus of care and treatment is aimed at patients who are currently experiencing a wide range of medically complex conditions including but not limited to, advanced COPD, recovering COVID-19, wounds, chronic infection, and stroke. The average length of a stay is approximately

one to two months. Working with one supervising therapist, my focus of care includes developing individualized treatment plans that include performance of ADLs, general strengthening, education on energy conservation and cardiopulmonary efficiency techniques.

El Dorado Senior Living, Richardson TX (6 months)

2021-2021

**Director of Rehabilitation/Certified Occupational Therapy Assistant**

As director of rehabilitation in an independent living facility my role was to direct and lead a team of physical, occupational and speech therapists as well as run and maintain clinic operations. Additional duties include organizing and leading exercise groups; health literacy talks and social activities within the senior living community. Further administrative responsibilities include promoting therapy services through pre-screening clients for therapy service needs, filing insurance information on behalf of the clients served by Legacy Healthcare Services, assisting clients locate and navigate through financial assistance programs, ensure communication with physicians' offices including referrals/updates to plans of care and ensuring that all therapy supervised visits and additional paperwork was completed on time and filed with the correct agency or agencies. Clinically, my role as an occupational therapy assistant includes implementation of a wide variety of therapy interventions based on the plan of care set by the supervising occupational therapist including activities of daily living, exercises, and physical agent modalities.

<b>Academic Volunteer Positions</b>
-------------------------------------

Parker University, Dallas, TX (8 years)

2016-2024

**Advisory Board Member for the School of Occupational Therapy Assistant**

Participating on a board of other occupational therapy practitioners not affiliated with the University, faculty members and current students, focus is on enriching the education of future occupational therapy assistant students. Special emphasis is on ensuring that proper accreditation standards, set by the American Council of Occupational Therapy Education, are met. Additional supportive services are provided through informal and formal learning opportunities, in both lecture formats and one-on-one conversations, current students as well as serving as a clinical instructor for the fieldwork portion of the occupational therapy assistant program.

Parker University, Dallas, TX (8 years)

2016-2024

**Fieldwork Educator**

As a fieldwork educator, I provide students with learning opportunities in the real-world on-site clinic working with patients/clients under my supervision. Students initially observe my assessment and treatment of patients/clients, following a structured scaffolding process and under my direct supervision, students begin to assess and treat clients. Upon successful completion of fieldwork experience, students will take on close to, or a full case load of patients/clients under their supervision and will function in the role of an occupational therapy assistant. Students are also expected to document and bill for services provided during treatment sessions as allowed under Medicare/Medicaid guidelines as well as other third-party payer sources guidelines.

### Clinical Volunteer Positions

AccentCare Texas Health Presbyterian Hospital, Dallas, TX (2 years)  
**Volunteer**

2023 – 2025

As a volunteer in the inpatient hospice care facility, my aim is to assist nursing staff, chaplains, music therapists, social workers and other volunteers ensure the comfort and care of patients and their families from time of admission to time of discharge. More specific duties include, but are not limited to, providing companionship to patients and their families, assisting in legacy projects, assisting in military pinning ceremonies, providing/locating information requested by patients and their family members and other duties as assigned by the volunteer coordinator.

Scottish Rite Hospital, Dallas, TX (13 years)  
**Child Life/Clinics/Evenings**

2007-2020

In collaboration with a team of approximately 100 other evening volunteers, our core responsibilities are to emphasize patient centered care using craft activities and games to allow patients and families to engage in opportunities outside of direct patient care with professional staff. Additional duties include developing and supporting special community-based programs to further support the awareness of hospital services and fundraising.

### Professional Licensures/Certifications

Texas Board of Occupational Therapy Examiners – Occupational Therapy Assistant (current through 2026)

National Board Certification of Occupational Therapy - Certified Occupational Therapy Assistant (current through 2026)

### Areas of Research in Graduate School and Research Interests

- Mental health on college campuses specifically among pre allied health science students and allied health students compared to the general college student population at both the undergraduate and graduate levels as well as on community college and university campuses. Additionally, focus of research is also aimed at addressing meaningful and appropriate intervention strategies to alleviate major psychological disorders among both pre allied health and allied health students to increase retention and reduce college stop out and dropout rates within the allied health science curriculums.
- Anthrozoology with specific focus on the relationship between the human-animal bond and how the biopsychosocial model interacts with the cognitive and physiological healing processes among a wide variety of physical impairments including, age-related cognitive decline, increased performance in exercise/physical activity to combat obesity, improve symptoms of autism spectrum disorder, manage/treat serious mental disorders, improve well-being and promotion of health along the lifespan and developmental milestones.
- Comparative animal anatomy and physiology specifically focus on analyzing and synthesizing the similarities and differences between the composition, structural

formation, performance, and pathophysiological changes among invertebrates and vertebrates at the cellular, histological, organ, organ system, and organismal levels.

- Photography with emphasis on the use of photographs to improve memory retrieval among older adults with cognitive impairments including normative aging processes as well as non-normative aging pathophysiological changes in memory/cognitive impairment such as, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease and Multiple Sclerosis. Additional research efforts in photography include the use of phototherapy for the treatment of grief and reminiscing among survivors and individuals diagnoses and being treated for terminal illnesses as part of legacy work in palliative and hospice care.
- Sleep and dreams with special focus on the biological and psychological factors that affect sleep patterns in humans and other animals in both REM and non-REM sleep at the neurological and psychological levels.
- Obesity with a specific focus on the biological and physiological aspect of what causes obesity from an endocrinological standpoint, which medications help treat obesity, which surgical options are most effective, but also what drives hunger, food addiction, and psychosocial factors that promote obese patients to improve their health and which environmental factors serve as deterrents to change in healthy behaviors among patients fighting obesity.

<b>Academic Awards and Accomplishments</b>
--

- Phi Theta Kappa – Weatherford College
- Dean's List – Texas Woman's University
- Epsilon Omega Epsilon – Texas Woman's University
- Omicron Delta Kappa – Texas A&M University Commerce
