

# Detailed Inventory

PWS Name: Texas A&M University  
 WWSID: 131006

Purpose of this worksheet: To provide a format water systems can use to track materials for each service line in the distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements, the columns with the aqua shading are required by the CDR. The worksheet includes examples in rows 22 - 25 and is formatted for approximately 2500 entries.

Note: Cells that have a superscript "r" are required fields; Cells that have a superscript "r" are conditionally required fields and can impact formulas throughout document.

TCSS 20643 (Rev. 5/17/2024)

Location Information					System-Owned Portion					Customer-Owned Portion					Entire Service Line	Other Potential Sources of Lead				Additional Information to Assign Tap Monitoring Timing					Lead Service Line Replacement		
Unique Service Line ID	Street Number <sup>r</sup>	Street Name <sup>r</sup>	City <sup>r</sup>	Zip Code <sup>r</sup>	Other Location Information <sup>r</sup>	GPS Coordinates - Latitude (Decimal degrees)	GPS Coordinates - Longitude (Decimal degrees)	System-Owned Portion Service Line Material Classification <sup>r</sup>	If Non-Lead in Column 1, Was Material Ever Previously Lead? <sup>r</sup>	Service Line Installation Date <sup>r</sup>	Notes	Customer-Owned Portion Service Line Material Classification <sup>r</sup>	Service Line Installation Date <sup>r</sup>	Notes	Entire Service Line Material Classification <sup>r</sup>	Is there a Lead Connection? <sup>r</sup>	Is there Lead Solder in the Service Line? <sup>r</sup>	Describe Other Fittings and Equipment Connected to the Service Line that Contain Lead	Building Type Connected to Service Line	Point-of Entry or Point-of Use Treatment Present?	Does this Interior Building Plumbing Contain Copper Pipes with Lead Solder Installed Before July 1, 1981?	Current LCR Sampling Site?	Sample Site Selection Criteria (Site Tier)	Date of System-owned LSR	Date of Customer-owned LSR		
A Unique ID# is required for each service line	Water systems must track addresses of all service lines in their internal metadata. For the public, accessible version, location identifiers are required for lead and general engineering requirements. If the system does not use addresses for its customer identifier, other options could include a landmark, intersection, block, or other means to uniquely identify the location. If using GPS coordinates, allow for GPS Coordinates - Latitude/Longitude field and include a description.					Diagram for this includes recommended substitutions, if "Non-Lead Other" service line is indicated lead					Diagram for this includes recommended substitutions, if "Non-Lead Other" service line is indicated lead					Diagram for this includes recommended substitutions, if "Non-Lead Other" service line is indicated lead	For example, background or a signal when the water meter is connected to the service line.				Note: This information may be helpful for identifying building plumbing to assess.
